Strategic Parts Management

Strategic Parts Management

PARTsolutions

The Strategic Parts Management System by Cadenas

70% of the manipulable overall product costs can be traced back to planning in the development phase and may be reduced through strategic parts management.

In modern companies, the strategic parts management system PARTsolutions helps, reduce and manage components and standard parts easily. The software solution PARTsolutions seamlessly integrated into the process chain and thus covers the entire cycle.

Through the connection of PARTsolutions with the data sources of available CAD and ERP systems, users receive all function related information for research and selection of parts at once.

What is Strategic Parts Management?

Strategic Part Management is a central point of every modern company to manage components and standard parts. PARTsolutions integrates directly into your workflow and closes gaps between your processes. By linking the different data bases of CAD- and ERP-systems you and your staff get all relevant information to search and find at a glance.

Strategic Parts Management Means:

- Costs have been effectively and lastingly reduced
- The processes have been accelerated
- Part multiplicity is reduced through consolidation of parts
- All information at a glance
- Finding instead of searching
- More freedom for creativity = Engineering instead of managing
- Spares sales resources
- Optimized global inventories
- Tighter integration with suppliers
- Improved product quality and reliability
- Increased profitability and customer satisfaction

eCATALOG SOLUTIONS

eCATALOGsolutions The Electronic Product Catalog by CADENAS

eCATALOGsolutions is a software solutions for manufacturers of standard and supplier parts for creating, managing and marketing electronic product catalogs.

In an increasingly digitalized world, CADENAS' electronic product catalogs make all digital product information available for the respective buyer target group.

Surveys have confirmed the success

of electronic product catalogs: About 87% of downloaded CAD products are purchased afterwards.

“If you download a 3-D CAD model, will it then be purchased?”

CADENAS' electronic product catalogs are the ideal marketing instrument for all component manufacturers. With the eCATALOGsolutions package, the CAD product data will be offered on numerous attractive vertical market places downloadable for free. This enables efficient communication with the proper target group of engineers and buyers.

Advantages of eCATALOG solutions:

- Optimal targeting
- Increase of sales output
- More marketing potential with minimum effort through numerous vertical market places
- Products are displayed for easy customer comprehension
- Optimal presentation of products through intelligent and top-quality 3-D CAD models
- Easy creation of electronic product catalog, also with corporate design
- Simple configuration of complex products possible

IRONCAD™ Partcommunity (Powered by CADENAS) <http://ironcad.partcommunity.com>

IRONCAD's PARTcommunity is an integrated solution for IRONCAD users to gain access to manufacturers online catalogs of standard and purchased parts in various 3D CAD formats for use in your IRONCAD design sessions.

In an increasingly digital world, the electronic product catalogs by CADENAS make all digital product information available for IRONCAD and INOVATE users.
